- How To Generate NewsBreak API Key

How To Generate NewsBreak API Key

Introduction

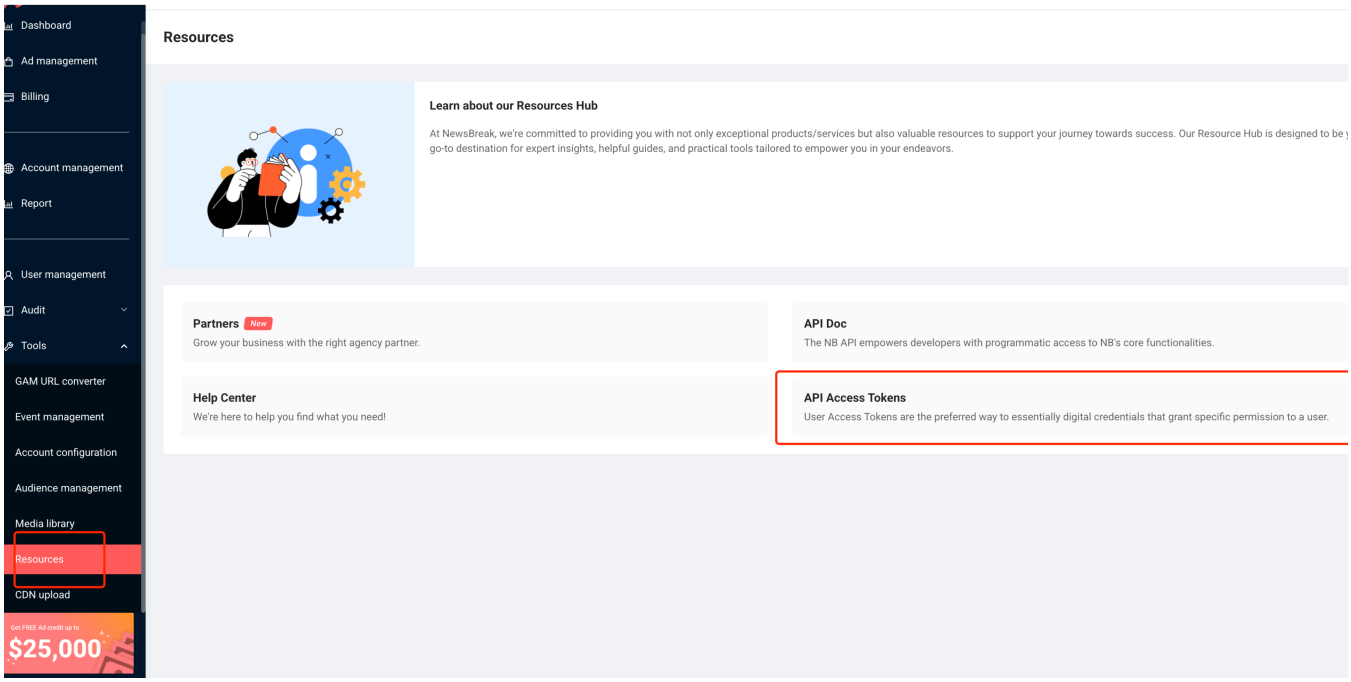

Welcome to the **NewsBreak API Integration Guide**! This guide will help you seamlessly integrate NewsBreak API into your application, enabling data exchange and automation. Follow the steps below to get started.

Step 1: Create an Ad Account

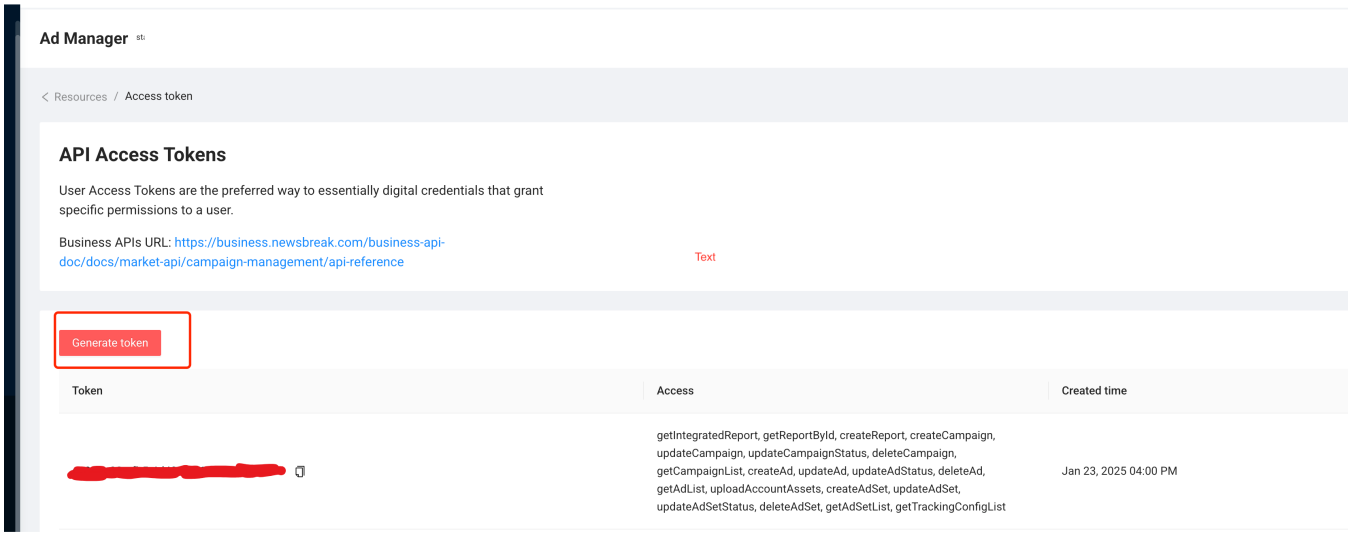

Before you can use the API, ensure you have an **ad account** in our **Ad Manager**. If you don’t have an account, sign up through platform.

Step 2: Obtain an API Access Token

1. Log in to your **Ad Manager** account.
2. Navigate to **Resources → API Access Tokens**.

3. Click "**Generate Token**" to create a new API access token.

> **Note:** Keep your API token secure and do not share it publicly. This token is required for authentication in API requests.

Step 3: Authenticate API Requests

Once you have your **API access token**, you can authenticate API requests by including the token in the HTTP **header**.

Authentication Header Format

Key	Value	Type
Access-Token	`your_access_token_here`	String

Step 4: Making API Requests

Below is an example of how to make an API request using **cURL**:

```
curl -X 'POST' \
'https://business.newsbreak.com/business-api/v1/reports/getIntegratedReport' \
-H 'accept: application/json' \
-H 'Access-Token: your_access_token' \
-H 'Content-Type: application/json' \
-d '{
  "name": "string",
  "dateRange": "FIXED",
  "startDate": "2024-01-01",
  "endDate": "2024-01-01",
```

```
  "filter": null,
  "filterIds": ["string"],
  "dimensions": ["DATE"],
  "metrics": ["COST"],
  "emails": ["your_email"],
  "editors": ["your_name"]
}'
```
